Linda asked the following question:

Any update on number of the 5 using alternative water?

My response to this question:

Hello Linda:

I have not been in contact with the five people that I collected water samples from in May of 2018, since Friday, June 15, 2018. One of the five contacted me on Friday and let me know that she was drinking her well water and had no other way at this time of getting alternative water.

The other four were buying, going to a neighbor to get water, or had filtration systems as of May 3, 2018.

I hope this answers your question.

Sincerely,

Cheryl Burdett
